# New Jersey Student Learning Standards 

Grades K-8

Mathletics Curriculum Alignment

## Kindergarten

| Domain | Cluster | Standard | Description | Activities |
| :--- | :--- | :--- | :--- | :--- |
| Counting and <br> Cardinality | A. Know number <br> names and the <br> count sequence. | K.CC.A.1 | Count to 100 by ones and by <br> tens. | Count by Tens <br> 1 to 30 <br> Cefore, After and Between to 20 |
| Cardinality | A. Know number <br> names and the <br> count sequence. | K.CC.A.2 | Count forward beginning from a <br> given number within the known <br> sequence (instead of having to <br> begin at 1). | Counting Forward <br> Going Up <br> Order Numbers to 10 <br> Order Numbers to 20 <br> Counting Up to 20 |
| Counting and |  |  |  |  |
| Cardinality | A. Know number <br> names and the <br> count sequence. | K.CC.A.3 | Write numbers from 0 to 20. <br> Represent a number of objects <br> with a written numeral 0-20 <br> (with 0 representing a count of <br> no objects). | Matching Numbers to 10 <br> Matching Numbers to 20 |
| Reading Numbers to 30 |  |  |  |  |

## Kindergarten

| Domain | Cluster | Standard | Description | $\equiv$ Activities |
| :---: | :---: | :---: | :---: | :---: |
| Counting and Cardinality | C. Compare numbers. | K.CC.C. 6 | Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group. | Picture Graphs: More or Less <br> More, Less or the Same to 10 <br> More, Less or the Same to 20 |
| Counting and Cardinality | C. Compare numbers. | K.CC.C. 7 | Compare two numbers between 1 and 10 presented as written numerals. | Teacher directed |
| Operations and <br> Algebraic <br> Thinking | A. Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from. | K.OA.A. 1 | Represent addition and subtraction up to 10 with objects, fingers, mental images, drawings, sounds, acting out situations, verbal explanations, expressions, or equations. | Model Addition Model Subtraction |
| Operations and Algebraic Thinking | A. Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from. | K.OA.A. 2 | Solve addition and subtraction word problems, and add and subtract within 10. | Adding to 10 Word Problems <br> Adding to 5 <br> Subtracting From 5 <br> Adding to Ten <br> All about Ten <br> Subtracting from Ten <br> Adding to Make 5 and 10 |
| Operations and <br> Algebraic <br> Thinking | A. Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from. | K.OA.A. 3 | Decompose numbers less than or equal to 10 into pairs in more than one way. | Teacher directed |
| Operations and Algebraic Thinking | A. Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from. | K.OA.A. 4 | For any number from 1 to 9 , find the number that makes 10 when added to the given number. | Adding to Make 5 and 10 |
| Operations and Algebraic Thinking | A. Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from. | K.OA.A. 5 | Demonstrate fluency for addition and subtraction within 5 . | Adding to 5 Subtracting From 5 |

## Kindergarten

| Domain | Cluster | Standard | Description | Activities |
| :--- | :--- | :--- | :--- | :--- |
| Number and <br> Operations in <br> Base Ten | A. Work with <br> numbers 11-19 to <br> gain foundations for <br> place value. | K.NBT.A.1 | Compose and decompose <br> numbers from 11 to 19 into ten <br> ones and some further ones, and <br> record each composition or <br> decomposition by a drawing or <br> equation; understand that these <br> numbers are composed of ten <br> ones and one, two, three, four, <br> five, six, seven, eight, or nine <br> ones. | Making Teen Numbers <br> Make Numbers Count |
| Measurement | A. Describe and <br> compare <br> measurable <br> attributes. | K.MD.A.1 | Describe measurable attributes <br> of objects, such as length or <br> weight. Describe several <br> measurable attributes of a single <br> object. | Everyday Length <br> Everyday Mass |
| Hot or Cold? |  |  |  |  |
| How Full? |  |  |  |  |

## Kindergarten

| Domain | Cluster | Standard | Description | Activities |
| :--- | :--- | :--- | :--- | :--- |
| Geometry | A. Identify and <br> describe shapes <br> (squares, circles, <br> triangles, <br> rectangles, <br> hexagons, cubes, <br> cones, cylinders, <br> and spheres). | K.G.A.3 | Identify shapes as two- <br> dimensional (lying in a plane, <br> "flat") or three-dimensional <br> ("solid"). | Teacher directed |
| Geometry | B. Analyze, <br> compare, create <br> and compose <br> shapes. | K.G.B.4 | ( | Analyze and compare two- and <br> three-dimensional shapes, in <br> different sizes and orientations, <br> using informal language to <br> describe their similarities, <br> differences, parts and other <br> attributes. |
| Geometry | B. Analyze, <br> compare, create <br> and compose <br> shapes. | K.G.B.5 | Count Sides and Corners <br> Relate Shapes and Solids <br> building shapes from <br> components and drawing <br> shapes. | Teacher directed |
| Geometry | B. Analyze, <br> compare, create <br> and compose <br> shapes. | K.G.B.6 | Compose simple shapes to form <br> larger shapes. | Teacher directed |

## Grade 1

| Domain | Cluster | Standard | Description | An Activities |
| :--- | :--- | :--- | :--- | :--- |
| Operations and <br> Algebraic <br> Thinking | A. Represent and <br> solve problems <br> involving addition <br> and subtraction. | 1.OA.A.1 | Use addition and subtraction <br> within 20 to solve word <br> problems involving situations <br> of adding to, taking from, <br> putting together, taking apart, <br> and comparing, with unknowns <br> in all positions. | Add and Subtract Using Graphs <br> Add and Subtract Problems <br> Adding to 10 Word Problems <br> Problems: Add and Subtract <br> Word Problems: Add and Subtract |
| Operations and | A. Represent and <br> solve problems <br> involving addition <br> and subtraction. | 1.OA.A.2 | Solve word problems that call <br> for addition of three whole <br> numbers whose sum is less <br> than or equal to 20. | Add Three 1-Digit Numbers <br> Add 3 Single Digit Numbers <br> Add 3 Numbers Using Bonds to 10 <br> Add and Subtract Problems |
| Operations and <br> Algebraic | B. Understand and <br> apply properties of <br> Thinking <br> relationship | between addition <br> and subtraction. | 1.OA.B.3 | Apply properties of operations <br> as strategies to add and <br> subtract. | | Commutative Property of Addition |
| :--- |
| Adding In Any Order |
| Add 3 Numbers Using Bonds to 10 |

## Grade 1

| Domain | Cluster | Standard | Description | \# Activities |
| :---: | :---: | :---: | :---: | :---: |
| Number and Operations in Base Ten | A. Extend the counting sequence. | 1.NBT.A. 1 | Count to 120 , starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral. | Make Big Numbers Count <br> Before, After \& Between to 100 <br> Counting Forward <br> Going Up |
| Number and Operations in Base Ten | B. Understand place value. | 1.NBT.B. 2 | Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: <br> a. 10 can be thought of as a bundle of ten ones called a "ten." <br> b. The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones. <br> c. The numbers $10,20,30$, $40,50,60,70,80,90$ refer to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones). | Place Value 1 <br> Making Teen Numbers <br> Making Numbers Count |
| Number and Operations in Base Ten | B. Understand place value. | 1.NBT.B. 3 | Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>,=$, and <. | Compare Numbers to 20 <br> Compare Numbers to 50 <br> Compare Numbers to 100 <br> Greater or Less to 100 |
| Number and Operations in Base Ten | C. Use place value understanding and properties of operations to add and subtract. | 1.NBT.C. 4 | Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10 , using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten. | Addictive Addition <br> Columns that Add <br> Complements to 10, 20, 50 <br> Complements to 50 and 100 |

## Grade 1

| Domain | Cluster | Standard | Description | \# Activities |
| :---: | :---: | :---: | :---: | :---: |
| Number and Operations in Base Ten | C. Use place value understanding and properties of operations to add and subtract. | 1.NBT.C. 5 | Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used. | 10 More, 10 Less <br> 1 More, 10 Less |
| Number and Operations in Base Ten | C. Use place value understanding and properties of operations to add and subtract. | 1.NBT.C. 6 | Subtract multiples of 10 in the range 10-90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. | Subtract Tens |
| Measurement and Data | A. Measure lengths indirectly and by iterating length units. | 1.MD.A. 1 | Order three objects by length; compare the lengths of two objects indirectly by using a third object. | Compare Length 1 <br> Comparing Length <br> Everyday Length |
| Measurement and Data | A. Measure lengths indirectly and by iterating length units. | 1.MD.A. 2 | Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps. | Measuring Length with Blocks |
| Measurement and Data | B. Tell and write time. | 1.MD.B. 3 | Tell and write time in hours and half-hours using analog and digital clocks. | Set Time to the Hour Set Time to the Half Hour |
| Measurement and Data | C. Represent and interpret data. | 1.MD.C. 4 | Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another. | Pictographs <br> Picture Graphs: Who has the Goods? <br> Read Graphs <br> Sorting Data |

## Grade 1

| Domain | Cluster | Standard | Description | : Activities |
| :---: | :---: | :---: | :---: | :---: |
| Geometry | A. Reason with shapes and their attributes. | 1.G.A. 1 | Distinguish between defining attributes versus non-defining attributes; build and draw shapes to possess defining attributes. | Collect Simple Shapes Collect the Shapes Collect More Shapes Count Sides and Corners |
| Geometry | A. Reason with shapes and their attributes. | 1.G.A. 2 | Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, halfcircles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape. | Teacher directed |
| Geometry | A. Reason with shapes and their attributes. | 1.G.A. 3 | Partition circles and rectangles into two and four equal shares, describe the shares using the words halves, fourths, and quarters, and use the phrases half of, fourth of, and quarter of. Describe the whole as two of, or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares. | Halves <br> Halves and Quarters |

## Grade 2

| Domain | Cluster | Standard | Description |  |
| :--- | :--- | :--- | :--- | :--- |
| Operations and <br> Algebraic <br> Thinking | A. Represent and <br> solve problems <br> involving addition <br> and subtraction. | 2.OA.A.1 | Use addition and subtraction <br> within 100 to solve one- and <br> two-step word problems <br> involving situations of adding <br> to, taking from, putting <br> together, taking apart, and <br> comparing, with unknowns in <br> all positions. | Bar Model Problems 1 <br> Bar Model Problems 2 |
| Operations and <br> Algebraic <br> Thinking | B. Add and subtract <br> within 20. | 2.OA.B.2 | Fluently add and subtract <br> within 20 using mental <br> strategies. By end of Grade 2, <br> know from memory all sums of <br> two one-digit numbers. | Addition <br> Addition Facts <br> Addictive Addition <br> Subtraction Facts to 18 <br> Simple Subtraction |
| Fact Families: Add and Subtract |  |  |  |  |

## Grade 2

| Domain | Cluster | Standard | Description | Activities |
| :--- | :--- | :--- | :--- | :--- |
| Number and <br> Operations in <br> Base Ten | A. Understand place <br> value. | 2.NBT.A.3 | Read and write numbers to <br> 1000 using base-ten numerals, <br> number names, and expanded <br> form. | Place Value 2 <br> Understanding Place Value 1 <br> Place Value Partitioning |
| Number and <br> Operations in <br> Base Ten | A. Understand place <br> value. | 2.NBT.A.4 | Compare two three-digit <br> numbers based on meanings of <br> the hundreds, tens, and ones <br> digits, using >, =, and < symbols <br> to record the results of <br> comparisons. | Which is Bigger? <br> Which is Smaller? |
| Number and <br> Operations in <br> Base Ten | B. Use place value <br> understanding and <br> properties of <br> operations to add <br> and subtract. | 2.NBT.B.5 | Fluently add and subtract <br> within 100 using strategies <br> based on place value, <br> properties of operations, <br> and/or the relationship <br> between addition and <br> subtraction. | Complements to 10, 20, 50 <br> Complements to 50 and 100 <br> Adding to 2-digit numbers <br> Decompose Numbers to Subtract |
| Number and | B. Use place value <br> understanding and <br> properties of <br> operations to add <br> and subtract. | 2.NBT.B.6 | B. | Add up to four two-digit <br> numbers using strategies <br> based on place value and <br> properties of operations. |

## Grade 2

| Domain | Cluster | Standard | Description | \# Activities |
| :---: | :---: | :---: | :---: | :---: |
| Number and Operations in Base Ten | B. Use place value understanding and properties of operations to add and subtract. | 2.NBT.B. 9 | Explain why addition and subtraction strategies work, using place value and the properties of operations. | Teacher directed |
| Measurement and Data | A. Measure and estimate lengths in standard units. | 2.MD.A. 1 | Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes. | Measuring Length <br> How Long Is That (Customary)? <br> Measure to the Nearest Half Inch |
| Measurement and Data | A. Measure and estimate lengths in standard units. | 2.MD.A. 2 | Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen. | Teacher directed |
| Measurement and Data | A. Measure and estimate lengths in standard units. | 2.MD.A. 3 | Estimate lengths using units of inches, feet, centimeters, and meters. | Inches, Feet, Yards |
| Measurement and Data | A. Measure and estimate lengths in standard units. | 2.MD.A. 4 | Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit. | Teacher directed |
| Measurement and Data | B. Relate addition and subtraction to length. | 2.MD.B. 5 | Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units. | Teacher directed |
| Measurement and Data | B. Relate addition and subtraction to length. | 2.MD.B. 6 | Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers $0,1,2, \ldots$, and represent whole-number sums and differences within 100 on a number line diagram. | Teacher directed |
| Measurement and Data | C. Work with time and money. | 2.MD.C. 7 | Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m. | Five Minute Times Quarter To and Quarter Past |
| Measurement and Data | C. Work with time and money. | 2.MD.C. 8 | Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and $\varsigma$ symbols appropriately. | How Much Money? (USD) <br> Money-Totalling (USD) <br> Who's got the Money? <br> Choosing the Fewest Coins (USD) |

## 11 | 3P Learning

## Grade 2

| Domain | Cluster | Standard | Description | : Activities |
| :---: | :---: | :---: | :---: | :---: |
| Measurement and Data | D. Represent and interpret data. | 2.MD.D. 9 | Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in wholenumber units. | Teacher directed |
| Measurement and Data | D. Represent and interpret data. | 2.MD.D. 10 | Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put together, take-apart, and compare problems using information presented in a bar graph. | Bar Graphs 1 <br> Bar Graphs 2 <br> Picture Graphs: single-unit scale |
| Geometry | A. Reason with shapes and their attributes. | 2.G.A. 1 | Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes. | How Many Faces? <br> How many Edges? <br> How many Corners? <br> Count Sides and Corners <br> Collect Simple Shapes <br> Collect More Shapes |
| Geometry | A. Reason with shapes and their attributes. | 2.G.A. 2 | Partition a rectangle into rows and columns of same-size squares and count to find the total number of them. | Teacher directed |
| Geometry | A. Reason with shapes and their attributes. | 2.G.A. 3 | Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape. | Shade Fractions <br> Halves <br> Halves and Quarters |

## Grade 3

| Domain | Cluster | Standard | Description | \# Activities |
| :---: | :---: | :---: | :---: | :---: |
| Operations and <br> Algebraic <br> Thinking | A. Represent and solve problems involving multiplication and division. | 3.OA.A. 1 | Interpret products of whole numbers. | Groups of Two <br> Groups of Three <br> Groups of Four <br> Groups of Five <br> Groups of Six <br> Groups of Seven <br> Groups of Eight <br> Groups of Nine <br> Groups of Ten <br> Multiplication Arrays <br> Arrays 1 <br> Frog Jump Multiplication <br> Model Multiplication to $5 \times 5$ |
| Operations and <br> Algebraic <br> Thinking | A. Represent and solve problems involving multiplication and division. | 3.OA.A. 2 | Interpret whole-number quotients of whole numbers. | Divide Into Equal Groups Dividing Threes <br> Dividing Fours <br> Dividing Fives <br> Dividing Sixes <br> Dividing Sevens <br> Dividing Eights <br> Dividing Nines <br> Dividing Tens <br> Frog Jump Division <br> Share the Treasure |
| Operations and <br> Algebraic <br> Thinking | A. Represent and solve problems involving multiplication and division. | 3.OA.A. 3 | Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities. | Multiplication Problems 1 <br> Fill the Jars <br> Problems: Times and Divide |
| Operations and <br> Algebraic <br> Thinking | A. Represent and solve problems involving multiplication and division. | 3.OA.A. 4 | Determine the unknown whole number in a multiplication or division equation relating three whole numbers. | Related Facts 2 <br> Missing Numbers: $\times$ and $\div$ facts |
| Operations and <br> Algebraic <br> Thinking | B. Understand properties of multiplication and the relationship between multiplication and division. | 3.OA.B. 5 | Apply properties of operations as strategies to multiply and divide. | Multiplication Turn-Abouts <br> Multiplication Properties <br> Fact Families: Multiply and Divide |

## Grade 3

| Domain | Cluster | Standard | Description | Activities |
| :--- | :--- | :--- | :--- | :--- |
| Operations and <br> Algebraic <br> Thinking | B. Understand <br> properties of <br> multiplication and <br> the relationship <br> between <br> multiplication and <br> division. | 3.OA.B.6 | Understand division as an <br> unknown-factor problem. | Missing Numbers: x and $\div$ facts |
|  |  |  | Fluently multiply and divide <br> within 100, using strategies <br> such as the relationship <br> between multiplication and <br> division or properties of | Related Facts 2 <br> operations. By the end of <br> Grade 3, know from memory <br> all products of two one-digit <br> numbers. |
| Operations and | Times Tables <br> Algebraic | C. Multiplication Facts and Divide <br> divide within 100. | 3.OA.C.7 |  |

## Grade 3

| Domain | Cluster | Standard | Description | $\equiv$ Activities |
| :---: | :---: | :---: | :---: | :---: |
| Number and Operations in Base Ten | A. Use place value understanding and properties of operations to perform multi-digit arithmetic. | 3.NBT.A. 2 | Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction. | Addition Properties <br> Add Three 2-Digit Numbers: Regroup <br> Add 3-Digit Numbers <br> Add 3-Digit Numbers: Regroup <br> Add Multi-Digit Numbers 1 <br> Strategies for Column Addition <br> Missing Numbers 1 <br> 3-Digit Differences <br> 3-Digit Differences with Zeros <br> 3-Digit Differences: 1 Regrouping <br> 3-Digit Differences: 2 Regroupings |
| Number and Operations in Base Ten | A. Use place value understanding and properties of operations to perform multi-digit arithmetic. | 3.NBT.A. 3 | Multiply one-digit whole numbers by multiples of 10 in the range 10-90 using strategies based on place value and properties of operations. | Multiply Multiples of 10 |
| Number and Operations Fractions | A. Develop understanding of fractions as numbers. | 3.NF.A. 1 | Understand a fraction $1 / b$ as the quantity formed by 1 part when a whole is partitioned into $b$ equal parts; understand a fraction $a / b$ as the quantity formed by $a$ parts of size $1 / b$. | Halves and Quarters <br> Thirds and Sixths <br> Shade Fractions <br> Model Fractions <br> What Fraction Is Shaded 1 |
| Number and Operations Fractions | A. Develop understanding of fractions as numbers. | 3.NF.A. 2 | Understand a fraction as a number on the number line; represent fractions on a number line diagram. <br> a. Represent a fraction $1 / b$ on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into $b$ equal parts. Recognize that each part has size $1 / b$ and that the endpoint of the part based at 0 locates the number $1 / b$ on the number line. <br> b. Represent a fraction $a / b$ on a number line diagram by marking off $a$ lengths $1 / b$ from 0 . Recognize that the resulting interval has size $a / b$ and that its endpoint locates the number $a / b$ on the number line. | Identifying Fractions on a Number Line |

## Grade 3

| Domain | Cluster | Standard | Description | \# Activities |
| :---: | :---: | :---: | :---: | :---: |
| Number and Operations Fractions | A. Develop understanding of fractions as numbers. | 3.NF.A. 3 | Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size. <br> a. Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line. <br> b. Recognize and generate simple equivalent fractions. Explain why the fractions are equivalent. <br> c. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. <br> d. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols $>,=$, or $<$, and justify the conclusions. | Equivalent Fraction Wall 1 Compare Fractions 1a Comparing Fractions 1 |
| Measurement and Data | A. Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects. | 3.MD.A. 1 | Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes. | What is the Time? <br> Five Minute Times <br> Time Mentals <br> Elapsed Time |
| Measurement and Data | A. Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects. | 3.MD.A. 2 | Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (I). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units. | Mass Word Problems Cups, Pints, Quarts, Gallons |

## Grade 3

| Domain | Cluster | Standard | Description | \# Activities |
| :---: | :---: | :---: | :---: | :---: |
| Measurement and Data | B. Represent and interpret data. | 3.MD.B. 3 | Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve oneand two-step "how many more" and "how many less" problems using information presented in scaled bar graphs. | Making Picture Graphs: With Scale <br> Pictographs <br> Bar Graphs 1 <br> Bar Graphs 2 <br> Add and Subtract Using Graphs <br> Picture Graphs: with scale \& half symbols |
| Measurement and Data | B. Represent and interpret data. | 3.MD.B. 4 | Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units - whole numbers, halves, or quarters. | Measure to the Nearest Half Inch |
| Measurement and Data | C. Geometric measurement: understand concepts of area and relate area to multiplication and to addition. | 3.MD.C. 5 | Recognize area as an attribute of plane figures and understand concepts of area measurement. <br> a. A square with side length 1 unit, called "a unit square," is said to have "one square unit" of area, and can be used to measure area. <br> b. A plane figure which can be covered without gaps or overlaps by $n$ unit squares is said to have an area of $n$ square units. | Teacher directed |
| Measurement and Data | C. Geometric measurement: understand concepts of area and relate area to multiplication and to addition. | 3.MD.C. 6 | Measure areas by counting unit squares (square cm , square $m$, square in, square ft, and nonstandard units). | Area of Shapes <br> Calculate Area of Shapes (inches, feet, yards) <br> Biggest Shape |

## Grade 3

| Domain | Cluster | Standard | Description | \# Activities |
| :---: | :---: | :---: | :---: | :---: |
| Measurement and Data | C. Geometric measurement: understand concepts of area and relate area to multiplication and to addition. | 3.MD.C. 7 | Relate area to the operations of multiplication and addition. <br> a. Find the area of a rectangle with wholenumber side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths. <br> b. Multiply side lengths to find areas of rectangles with whole number side lengths in the context of solving real world and mathematical problems, and represent wholenumber products as rectangular areas in mathematical reasoning. <br> c. Use tiling to show in a concrete case that the area of a rectangle with whole-number side lengths $a$ and $b+c$ is the sum of $a \times b$ and $a \times c$. Use area models to represent the distributive property in mathematical reasoning. <br> d. Recognize area as additive. Find areas of rectilinear figures by decomposing them into nonoverlapping rectangles and adding the areas of the nonoverlapping parts, applying this technique to solve real world problems. | Area of Squares and Rectangles Calculate Area of Squares and Rectangles Area: Compound Figures |

## Grade 3

| Domain | Cluster | Standard | Description |  |
| :--- | :--- | :--- | :--- | :--- |
| Measurement <br> and Data | D. Geometric <br> measurement: <br> recognize perimeter <br> as an attribute of <br> plane figures and <br> distinguish between <br> linear and area <br> measures. | 3.MD.D.8 | Solve real world and <br> mathematical problems <br> involving perimeters of <br> polygons, including finding the <br> perimeter given the side <br> lengths, finding an unknown <br> side length, and exhibiting <br> rectangles with the same <br> perimeter and different areas <br> or with the same area and <br> different perimeters. | Perimeter <br> Perimeter: Squares and Rectangles <br> Perimeter Detectives 1 <br> Perimeter of Shapes |
| Geometry | A. Reason with <br> shapes and their <br> attributes. | 3.G.A.1 | Understand that shapes in <br> different categories may share <br> attributes, and that the shared <br> attributes can define a larger <br> category. Recognize <br> rhombuses, rectangles, and <br> squares as examples of <br> quadrilaterals, and draw <br> examples of quadrilaterals that <br> do not belong to any of these <br> subcategories. | Shapes <br> Collect the Shapes 1 <br> Collect the Shapes 2 <br> Collect More Shapes <br> Collect the Polygons <br> Count Sides and Corners |
| Geometry | A. Reason with <br> shapes and their <br> attributes. | 3.G.A.2 | Partition shapes into parts with <br> equal areas. Express the area <br> of each part as a unit fraction <br> of the whole. | Shade Fractions |

| :---: | :---: | :---: | :---: | :---: |
| Geometry | A. Understand congruence and similarity using physical models, transparencies, or geometry software. | 8.G.A. 5 | Use informal arguments to establish facts about the angle sum and exterior angle of triangles, about the angles created when parallel lines are cut by a transversal, and the angle angle criterion for similarity of triangles. | Angles and Parallel Lines <br> Angles on Parallel Lines Introduction to Angles on Parallel Lines 1 <br> Introduction to Angles on Parallel Lines <br> 3 <br> Parallel Lines <br> Vertically Opposite Angles: Unknown <br> Values <br> Vertically Opposite: Value of $x$ <br> Using Similar Triangles <br> Similar Triangles <br> Angle Measures in a Triangle <br> Angle Sum of a Triangle <br> Exterior Angles of a Triangle |
| Geometry | B. Understand and apply the Pythagorean Theorem. | 8.G.B. 6 | Explain a proof of the Pythagorean Theorem and its converse. | Pythagorean Triads |
| Geometry | B. Understand and apply the Pythagorean Theorem. | 8.G.B. 7 | Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in realworld and mathematical problems in two and three dimensions. | Pythagorean Theorem <br> Pythagoras: Find a Short Side (integers only) <br> Pythagoras: Find a Short Side (decimal values) <br> Pythagoras: Find a Short Side (rounding needed) <br> Pythagoras' Theorem <br> Find Slant Height |
| Geometry | B. Understand and apply the Pythagorean Theorem. | 8.G.B. 8 | Apply the Pythagorean Theorem to find the distance between two points in a coordinate system. | Distance Between Two Points |
| Geometry | C. Solve real-world and mathematical problems involving volume of cylinders, cones, and spheres. | 8.G.C. 9 | Know the formulas for the volumes of cones, cylinders, and spheres and use them to solve real-world and mathematical problems. | Volume: Cylinders <br> Volume: Cones <br> Volume: Spheres <br> Volume: Composite Figures |
| Statistics and Probability | A. Investigate patterns of association in bivariate data. | 8.SP.A. 1 | Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association. | Data Analysis: Scatter Plots Scatter Plots |

## Grade 8

| Domain | Cluster | Standard | Description |  |
| :--- | :--- | :--- | :--- | :--- |
| Statistics and <br> Probability | A. Investigate <br> patterns of <br> association in <br> bivariate data. | 8.SP.A.2 | Know that straight lines are <br> widely used to model <br> relationships between two <br> quantitative variables. For <br> scatter plots that suggest a linear <br> association, informally fit a <br> straight line, and informally <br> assess the model fit by judging <br> the closeness of the data points <br> to the line. | Teacher directed |
| Statistics and <br> Probability | A. Investigate <br> patterns of <br> association in <br> bivariate data. | 8.SP.A.3 | Use the equation of a linear <br> model to solve problems in the <br> context of bivariate <br> measurement data, interpreting <br> the slope and intercept. | Teacher directed |
|  |  | Understand that patterns of <br> association can also be seen in <br> bivariate categorical data by <br> displaying frequencies and <br> relative frequencies in a two-way <br> table. Construct and interpret a <br> two-way table summarizing data <br> on two categorical variables <br> collected from the same <br> subjects. Use relative <br> frequencies calculated for rows <br> or columns to describe possible <br> association between the two <br> variables. | Probability Tables <br> Relative Frequency <br> Two-way Table Probability |  |
| Statistics and <br> Probability | A. Investigate <br> patterns of <br> association in <br> bivariate data. | 8.SP.A.4 |  |  |
