2.2 Pythagoras and trigonometry .....	15
<b>3 Statistics and Probability .....</b>	<b>17</b>
3.1 Chance .....	17

3.2 Data representation and interpretation.....	17
---	----

# Year 9

## 1 Number and Algebra

### 1.1 Real numbers

Outcome	Quests	Content
8. Solve problems involving direct proportion. Explore the relationship between graphs and equations corresponding to simple rate problems	Proportion, rates, graphs & equations	Unit rates
		Converting rates
		Direct proportion
		Indirect/inverse proportion
		Direct and inversely proportionate graphs
		Interpret and use conversion graphs
		The constant of proportionality
		Graph equations of direct proportion
		Distance, speed and time problems
9. Apply index laws to numerical expressions with integer indices	Index laws with numerical expressions	Travel graphs
		Mixed index laws numerical expressions
10. Express numbers in scientific notation	Express numbers in scientific notation	Index laws: positive and negative integer index
		Introducing scientific notation
		Converting: scientific not. & basic numbers
		Calculating and rounding with scientific notation

### 1.2 Money and financial mathematics

Outcome	Quests	Content
11. Solve problems involving simple interest	Solve problems involving simple interest	Simple interest

### 1.3 Patterns and algebra

Outcome	Quests	Content
12. Extend and apply the index laws to variables, using positive integer indices and the zero index	Index laws with variables	Mixed index laws algebraic expressions
13. Apply the distributive law to the expansion of algebraic expressions,	Applying the distributive law	Applying the distributive law

including binomials, and collect like terms where appropriate		
---	--	--

## 1.4 Linear and non-linear relationships

Outcome	Quests	Content
14. Find the distance between two points located on the Cartesian plane using a range of strategies, including graphing software	Finding the distance between two points	Distance between two points without the formula
		Distance between two points using the formula
15. Find the midpoint and gradient of a line segment (interval) on the Cartesian plane using a range of strategies, including graphing software	Midpoint & gradient of line segments	Finding the midpoint without the formula
		Finding the midpoint using the formula
		Finding the gradient without the formula
		Finding the gradient using the formula
16. Sketch linear graphs using the coordinates of two points and solve linear equations	Linear graphs & solving linear equations	Vertical and horizontal lines
		Finding and using x and y-intercepts
		Graphing using a table of values
		Graphing using the gradient-intercept method
		Comparing linear relationships
17. Graph simple non-linear relations with and without the use of digital technologies and solve simple related equations	Graph & solve non-linear relationships	Further linear equations
		Graphing simple non-linear relations
		Solving simple non-linear relationships
		Parabolas
		Exponential graphs
		Circles

## 2 Measurement and Geometry

### 2.1 Using units of measurement

Outcome	Quests	Content
16. Calculate areas of composite shapes	Areas of composite shapes	Areas of composite shapes
17. Calculate the surface area and volume of cylinders and solve related problems	Surface area and volume of cylinders	Volumes of cylinders
		Surface area of cylinders
18. Solve problems involving the surface area and volume of right prisms	Surface area and volume of right prisms	Surface area of right prisms with nets
		Surface area problems
		Volumes of composite right prisms
19. Investigate very small and very large time scales and intervals	Large/small amounts time, data, limits	Significant figures
		Amounts of data
		Large and small time intervals
		Representing large and small numbers
		Limits of accuracy

### 2.2 Geometric reasoning

Outcome	Quests	Content
20. Use the enlargement transformation to explain similarity and develop the conditions for triangles to be similar	Similar triangles	Introducing similarity
		Similar triangles
21. Solve problems using ratio and scale factors in similar figures	Scale factors with similar figures	Scale factors
		Area and volume scale factors

### 2.3 Pythagoras and trigonometry

Outcome	Quests	Content
22. Investigate Pythagoras' Theorem and its application to solving simple problems involving right angled triangles	Pythagoras' Theorem	Identifying sides on right-angled triangles
		Finding a shorter side using Pythagoras' Theorem
		Finding the hypotenuse using Pythagoras' Theorem
		Solving problems involving Pythagoras' Theorem
		Exploring Pythagorean Triads
		Using the Converse of Pythagoras' Theorem
		Solving Pythagoras' Theorem problems: exact values

23. Use similarity to investigate the constancy of the sine, cosine and tangent ratios for a given angle in right-angled triangles	Introducing trigonometry	Introducing trigonometry
		Calculating trigonometric ratios and angles
24. Apply trigonometry to solve right-angled triangle problems	Applying trigonometry	Finding the missing side using trig ratios
		Finding the missing angle using trig ratios
		Solving 2D and 3D problems using trig ratios

## 3 Statistics and Probability

### 3.1 Chance

Outcome	Quests	Content
25. List all outcomes for two-step chance experiments, both with and without replacement using tree diagrams or arrays. Assign probabilities to outcomes and determine probabilities for events	List outcomes and find probabilities	The fundamental counting principle
		Two-step chance experiments with replacement
		Two-step chance experiments without replacement
26. Calculate relative frequencies from given or collected data to estimate probabilities of events involving 'and' or 'or'	Calculating and using relative frequency	Calculating and using relative frequency
27. Investigate reports of surveys in digital media and elsewhere for information on how data were obtained to estimate population means and medians	Making population predictions from data	Using data to make predictions about populations

### 3.2 Data representation and interpretation

Outcome	Quests	Content
28. Identify everyday questions and issues involving at least one numerical and at least one categorical variable, and collect data directly and from secondary sources	Collecting everyday data	Collecting everyday data
29. Construct back-to-back stem-and-leaf plots and histograms and describe data, using terms including 'skewed', 'symmetric' and 'bi modal'	Construct & interpret data displays	Constructing and interpreting data displays
30. Compare data displays using mean, median and range to describe and interpret numerical data sets in terms of location (centre) and spread	Comparing data displays	Comparing data displays

# Year 10

## 1 Number and Algebra

### 1.1 Money and financial mathematics

Outcome	Quests	Content
29. Connect the compound interest formula to repeated applications of simple interest using appropriate digital technologies	Compound & simple interest	Compound interest
		Comparing simple and compound interest
		Appreciation and depreciation

### 1.2 Patterns and algebra

Outcome	Quests	Content
30. Factorise algebraic expressions by taking out a common algebraic factor	Factorising algebraic expressions	Factorising
31. Simplify algebraic products and quotients using index laws	Index laws	Indices: multiplication
		Indices: division
		Indices: power of a power
		Indices: zero index
		Indices: mixed basic operations with coefficient = 1
		Indices: mixed basic operations with coefficient >1
		Indices: negative index with numerical base
		Indices: negative index, algebraic & numerical base
		Indices: mixed with negative indices
32. Apply the four operations to simple algebraic fractions with numerical denominators	Algebraic fractions	Algebraic fractions: 4 ops numerical denominators
		Algebraic fractions: simplifying
33. Expand binomial products and factorise monic quadratic expressions using a variety of strategies	Binomial expansions & basic quadratics	Expanding binomial products
		Factorising monic quadratic trinomials
		Further binomial expansions
34. Substitute values into formulas to determine an unknown	Substituting into formulas	Using authentic formula

### 1.3 Linear and non-linear relationships

Outcome	Quests	Content
35. Solve problems involving linear equations, including those derived from formulas	Problems involving linear equations	Word problems
36. Solve linear inequalities and graph their solutions on a number line	Linear inequalities and their graphs	Understanding inequalities
		Solving linear inequalities
37. Solve linear simultaneous equations, using algebraic and graphical techniques, including using digital technology	Linear simultaneous equations	Simultaneous equations
38. Solve problems involving parallel and perpendicular lines	Parallel and perpendicular lines	Parallel lines
		Perpendicular lines
		Equations of lines: parallel & perpendicular lines
		Problems involving parallel & perpendicular lines
39. Explore the connection between algebraic and graphical representations of relations such as simple quadratics, circles and exponentials using digital technology as appropriate	Representations of non-linear relations	Representations of non-linear relations
40. Solve linear equations involving simple algebraic fractions	Equations involving algebraic fractions	Equations involving algebraic fractions
41. Solve simple quadratic equations using a range of strategies	Solving simple quadratic equations	Solving simple quadratic equations

## 2 Measurement and Geometry

### 2.1 Using units of measurement

Outcome	Quests	Content
42. Solve problems involving surface area and volume for a range of prisms, cylinders and composite solids	Area of volume of composite solids	Surface area of composite solids
		Volume of composite solids

### 2.2 Geometric reasoning

Outcome	Quests	Content
44. Apply logical reasoning, including the use of congruence and similarity, to proofs and numerical exercises involving plane shapes	Solve problems using geometric reasoning	Solving problems using geometric reasoning

### 2.3 Pythagoras and trigonometry

Outcome	Quests	Content
45. Solve right-angled triangle problems including those involving direction and angles of elevation and depression	Angles of elevation/depression & bearings	Angles of elevation and depression
		Compass bearings
		True bearings

## 3 Statistics and Probability

### 3.1 Chance

Outcome	Quests	Content
46. Describe the results of two- and three-step chance experiments, both with and without replacements, assign probabilities to outcomes and determine probabilities of events. Investigate the concept of independence	Two/three step experiments, independence	Three-step chance experiments with replacement
		Three-step chance experiments without replacement
		Independent events
47. Use the language of 'if... then', 'given', 'of', 'knowing that' to investigate conditional statements and identify common mistakes in interpreting such language	Conditional probability	Conditional probability introduction
		Conditional probability and two-way tables
		Conditional probability and tree diagrams
		Conditional probability and arrays
		Conditional probability and Venn diagrams
		Set theory and Venn diagrams

### 3.2 Data representation and interpretation

Outcome	Quests	Content
48. Determine quartiles and interquartile range	Interquartile range	Interquartile range
49. Construct and interpret box plots and use them to compare data sets	Constructing and interpreting Box plots	Constructing and interpreting Box plots
50. Compare shapes of box plots to corresponding histograms and dot plots	Comparing Box plots	Comparing Box plots
51. Use scatter plots to investigate and comment on relationships between two numerical variables	Scatter plots	Scatter plots
52. Investigate and describe bivariate numerical data where the independent variable is time	Bivariate data	Bivariate data
53. Evaluate statistical reports in the media and other places by linking claims to displays, statistics and representative data	Evaluating statistical reports	Evaluating statistical reports

# Year 10A

## 1 Number and Algebra

### 1.1 Real numbers

Outcome	Quests	Content
64. Define rational and irrational numbers and perform operations with surds and fractional indices	Rational & irrational numbers and surds	Understanding rational and irrational numbers
		Introducing surds
		Surd general rules
		Simplification and addition/subtraction of surds
		Expanding brackets with surds
		Rationalising the denominator
		Convert recurring decimals into rational numbers
		Solving problems involving surds
65. Use the definition of a logarithm to establish and apply the laws of logarithms	Logarithms and their laws	Introducing logarithms
		Multiplication log law
		Division log law 1
		Division log law 2
		Log results
		Log graphs and relationship with exponentials
		Solving equations with logarithms

### 1.2 Patterns and algebra

Outcome	Quests	Content
66. Investigate the concept of a polynomial and apply the factor and remainder theorems to solve problems	Polynomials	Polynomials introduction
		Remainder and factor theorems

### 1.3 Linear and non-linear relationships

Outcome	Quests	Content
67. Describe, interpret and sketch parabolas, hyperbolas, circles and exponential functions and their transformations	Functions and their transformations	Exploring parabolas
		Parabolas: vertex and axis of symmetry
		Graphing parabolas
		Parabolas and their transformations

		Graphing hyperbolas
		Hyperbolas and their transformations
		Graphing circles
		Circles and their transformations
		Exponential functions and their transformations
		General non-linear relationships
70. Solve simple exponential equations	Solve exponential equations	Solve exponential equations
68. Apply understanding of polynomials to sketch a range of curves and describe the features of these curves from their equation	Sketching polynomials	Sketching polynomials
69. Factorise monic and non-monic quadratic expressions and solve a wide range of quadratic equations derived from a variety of contexts	Factorising and solving quadratics	Factorising using difference of 2 squares
		Factorising using grouping
		Factorising using perfect squares
		Factorising quadratic trinomials
		Factorising complex fractions
		Solving quadratic equations by factorisation
		Solving quadratic equations: completing the square
		Solving quadratic equations using the quadratic formula
		Solving a variety of quadratic equations
		The discriminant
		Quadratic equations in context

## 2 Measurement and Geometry

### 2.1 Using units of measurement

Outcome	Quests	Content
71. Solve problems involving surface area and volume of right pyramids, right cones, spheres and related composite solids	Surface area & volume: composite solids	Surface area of pyramids and cones
		Surface area of spheres
		Find dimensions of objects given the surface area
		Surface area of composite solids
		Volume of cones
		Volume of spheres
		Volume of composite solids
72. Prove and apply angle and chord properties of circles	Properties of circles	Circle terminology
		Circle properties: tangents
		Circle properties: equal radii
		Circle properties: angle in a semicircle property
		Circle properties: solve problems using properties
		Circle properties: solve problems using properties
		Circle properties: solve problems using properties

### 2.2 Pythagoras and trigonometry

Outcome	Quests	Content
73. Establish the sine, cosine and area rules for any triangle and solve related problems	Trigonometry: non-right-angled triangles	Sine rule
		Cosine rule
		Area rule
		Solving problems in non-right-angled triangles
		Solving problems in non-right-angled triangles
		Solving problems in non-right-angled triangles
74. Use the unit circle to define trigonometric functions, and graph them with and without the use of digital technologies	Trigonometry: identities, ratios, angles	Investigating trigonometric ratios
		Angles of any magnitude
		Angle of inclination of a line and its gradient
75. Solve simple trigonometric equations	Solving simple trigonometric equations	Solving simple trigonometric equations
76. Apply Pythagoras' Theorem and trigonometry to solving three-	Solving problems in three dimensions	Solving problems in three dimensions

dimensional problems in right-angled triangles		
76. Apply Pythagoras' Theorem and trigonometry to solving three-dimensional problems in right-angled triangles	Solving problems in three dimensions	Solving problems in three dimensions

## 3 Statistics and Probability

### 3.1 Chance

Outcome	Quests	Content
77. Investigate reports of studies in digital media and elsewhere for information on their planning and implementation	Critical analysis of data in the media	Critical analysis of data in the media

### 3.2 Data representation and interpretation

Outcome	Quests	Content
78. Calculate and interpret the mean and standard deviation of data and use these to compare data sets	Mean and standard deviation	Using the mean and standard deviation of data sets
		Comparing data using mean and standard deviation
79. Use information technologies to investigate bivariate numerical data sets. Where appropriate use a straight line to describe the relationship allowing for variation	Bivariate data and lines of best fit	Bivariate data and lines of best fit
