

# Virtual to in person transition pack

# Teaching Reflections

Over the last 18 months, teaching practices have changed because of unique learning environments. Adapting to virtual and hybrid learning has encouraged us as teachers to be even more creative, to experiment, and to teach in innovative ways.

As you transition back into the classroom and into more traditional pedagogy and routines, reflect on your experience with virtual and hybrid learning environments to consider the following questions:

What have you learned from your pandemic strategies and pedagogy?

What new teaching practices are you planning to bring back into the classroom as you transition back to in-person teaching?

What technologies can you continue to integrate into in-person teaching and learning?

What are your expectations for student engagement, and will they need to be revised or supported in a different way?

How can you check in with your students to support their confidence returning to the classroom?

# Daily Ticket In

Copy and cut for daily use or laminate and attach to student desks for reusable daily check ins to identify opportunities to address emotional health and participation.
