Guidelines of the competition

The **November Numeracy Challenge** will run from Monday 18th November until Sunday 24th November (1 week).

We are challenging you to earn as many participation points as you can. The first placed school will be the school with the highest average total of participation points.

This will be calculated by taking the total number of participation points divided by the total number of registered students in the school.

Rules

- This competition is open to Mathletics subscribed schools in the United States
- Schools must be registered for the competition
- Only students can complete the activities and earn points
- Only points and activities mastered within the dates of the competition will be calculated
- Work completed on tablets, in offline mode may not be calculated
- Schools may add additional students for free, for the duration of the competition only

Support Team

Contact us. We're here for you. Our dedicated team are on hand to answer any questions you may have. We're very friendly and passionate about education.

If you have a question about the **November Numeracy Challenge** or just want to discuss how to meet your school's objectives with Mathletics, do not hesitate to get in touch. We look forward to hearing from you!

How to master curriculum activities and earn points

Curriculum Activities

- 10 points per correct answer within curriculum activities.
- 20 points per correct answer within a Topic Test. *

* Within the Mathletics curriculum a maximum of 300 Points can be earned by completing activities in the **'Learn'** area of the student console and in **'Live Mathletics'**. This is designed to encourage students to attempt a wide range of activities.

How to master an activity

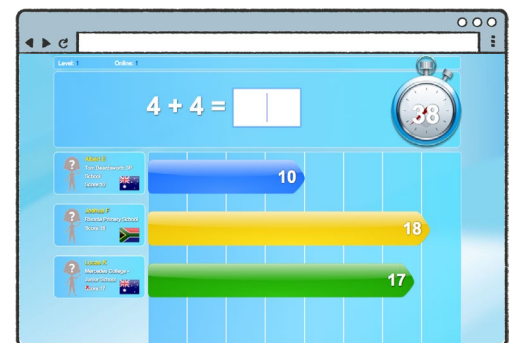

The students need to earn a score of 85% or higher to "master" an activity. Students will see a green bar when they have mastered an activity.

Live Mathletics

- Students earn one point per correct answer.
- Students earn two points per correct answers on their bonus level.*

* The bonus level is indicated by a gold star next to the level number.

Teacher tip

In your teacher console, the **'Assign'** module is used for setting targeted curriculum activities for individuals or groups of students. You can use the **'Activity Mastery'** tile to assign a curriculum activity to all your students by clicking the circle next to the activity name. Follow the prompts to set a start date and an optional end date.

- Sign in to Mathletics to view more tutorial videos, located on the dashboard of your teacher console.

List of prizes

We are excited to announce the following great prizes:

1st PLACE

\$100 Discount on 3P Learning Professional Learning Services

November Numeracy Challenge

18th - 24th November 2019

Parents & Carers

Your child's school has entered in the **November Numeracy Challenge**. This is a math challenge focused on students mastering curriculum activities and practicing their mental math skills. Prizes are awarded for top performing schools

There is also a free Mathletics app for tablet devices that students can use to access Mathletics from anywhere. All of their activities are recorded and will be synced with their main Mathletics account.

The app is available for iPad and Android tablets.

Please find your child's username and password below. Let's work together to inspire a love of learning!
