## More Bike Racks

Our class believes that the school needs to buy more bike racks.

Firstly, there are not enough bike racks for everyone to use. This means that students just dump their bikes on the ground for other people to trip over. It is really dangerous. Last week, Ahmed from 2B tripped over a bike and he got a very nasty cut on his shin.

Another reason for getting more bike racks is that it is not safe. They can be stolen or damaged by other people. If they were in a proper bike rack, owners could lock their bike up and they would be secure.

Finally, if the school bought more bike racks, it would encourage students to exercise. Riding to school is healthier than driving to school in a car. It would also help the traffic jams outside school in the mornings and afternoons with fewer parents picking up their children.

So it is obvious that our school needs more bike racks. Keep the students of Peddalin Public School safe!
