## Down in the Dirt

Caving takes us deep within the earth. Down here in the dark, it is a very different world to the one we know. Flickering torches guide the way, and dripping water is the only sound.

Caving involves a lot of crawling, squeezing, sliding and stooping, often in mud and water. It is not for people who are claustrophobic or those who want to keep their clothes clean.

But caving gives you the most amazing sights: gigantic chambers and deep, black holes, underground lakes and rivers, and beautiful stalagmites and hanging stalactites. Perhaps best of all, it makes you feel that you are in a place where no-one else has been before.

Label the diagram (cave roof, cave floor, stalagmites, stalactites)
