

Quick Guide to Differentiation with Mathletics

Mathletics

1 Assign an Assessment

- Click Assign & Review 
- Click Tests 
- Use the filters to find the right assessment
- Click [Schedule](#)
- Select students and start and end times  

You can preview the assessments before scheduling. Once the students have completed the assessment, click back into tests, and then Results.

2 Create learning groups

- Click Manage Students 
- Click [+ New Group](#)
- Enter name and course level
- Select the group from the drop down across from students' names
- Click [Apply](#)

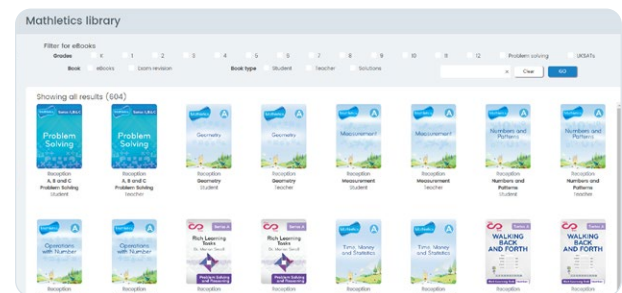

You can move students in and out of groups according to their progress throughout the year.

3 Use the Mathletics Library to print worksheets at any level worksheets

- Click Resource Hub 
- Click Mathletics Library 
- Select a workbook
- Click [Download eBook](#)

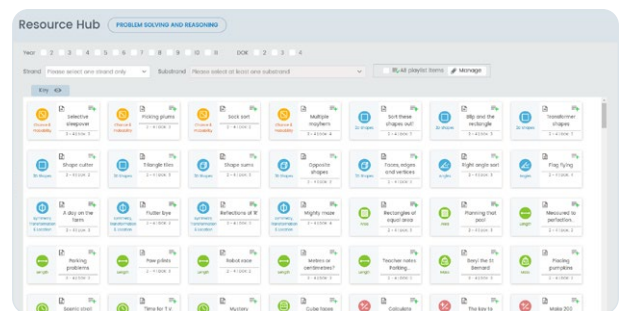

Students don't see the grade/year level of the worksheets.

4 Assign Problem Solving & Reasoning at any grade level and by depth of knowledge

- Click Resource Hub 
- Click Problem Solving & Reasoning 
- Use filters to assign different grades/years and depth of knowledge
- Select PSR activity
- Click [Assign to...](#)

Click into Assign & Review, then Problem Solving & Reasoning to view your students work and answer any questions they have right online! You can preview each activity prior to assigning.

5 Set minimum levels in Live Mathletics according to students' ability

- Click Settings 
- Select levels for class, group or individuals
- Click [Save](#)

You can change minimum levels as students progress. Check their results in Student Reports, Live Mathletics points.
