

Quick Guide to Homework with STEMscopes Science

1 Assign a Module Activity

- Find your module activity using the navigation menu on the right side of a module
- Select **Student View**
- Click on the student icon
- Select students and start and due date
- Select **Add this Assignment**

You can assign any content in a module as an activity for your students to complete. Once students have completed the task, go to Assignments in Students to check, and grade their work.

2 Create and Assign a Custom Assessment

- Click **Assessments**
- Give your assessment a name
- Select appropriate questions
- Click **Create Assessment**
- To add students, click on the saved assessment
- Click on the student icon
- Select students and start and due date
- Select **Add this Assignment**

Creating your own tasks in Assessments gives you the flexibility to assign students specific content for homework.

3 Build Students' Vocabulary with the Glossary

- Students login
- Click **Glossary**

Students can explore and learn new scientific terms to help them develop a deeper understanding of scientific concepts. A simple but effective homework task.
