

Quick Guide to Viewing Progress with STEMscopes Science

1 Class Module Activity Results

- Click **Students**
- Select **Class**
- Click **Assignments**
- Select an assigned activity

In a snapshot, view the whole class grade, individual student grades, and the time each student has taken to complete the assigned module activity. Perfect for quickly seeing excelling and struggling students.

2 Class Assessment Results

- Click **Students**
- Select **Class**
- Click **Assignments**
- Select assessment

Note: Your assessments will have 'from Assessments' and the end of the task name.

In a snapshot, view the whole class grade, individual student grades, and the time each student has taken to complete the assessment task, making it easy to see if students need to revisit a specific topic.

3 Individual Student Results

- Click **Students**
- Select **Class**
- Select student
- Click on **Results** to see individual results for an assignment that's been completed and marked
- Click on **View Progress** to see student progress for a partially completed task

The 'grade' column gives you the results of all completed assignments for one student.
