

Dashboard: This takes you to your Teacher Dashboard.

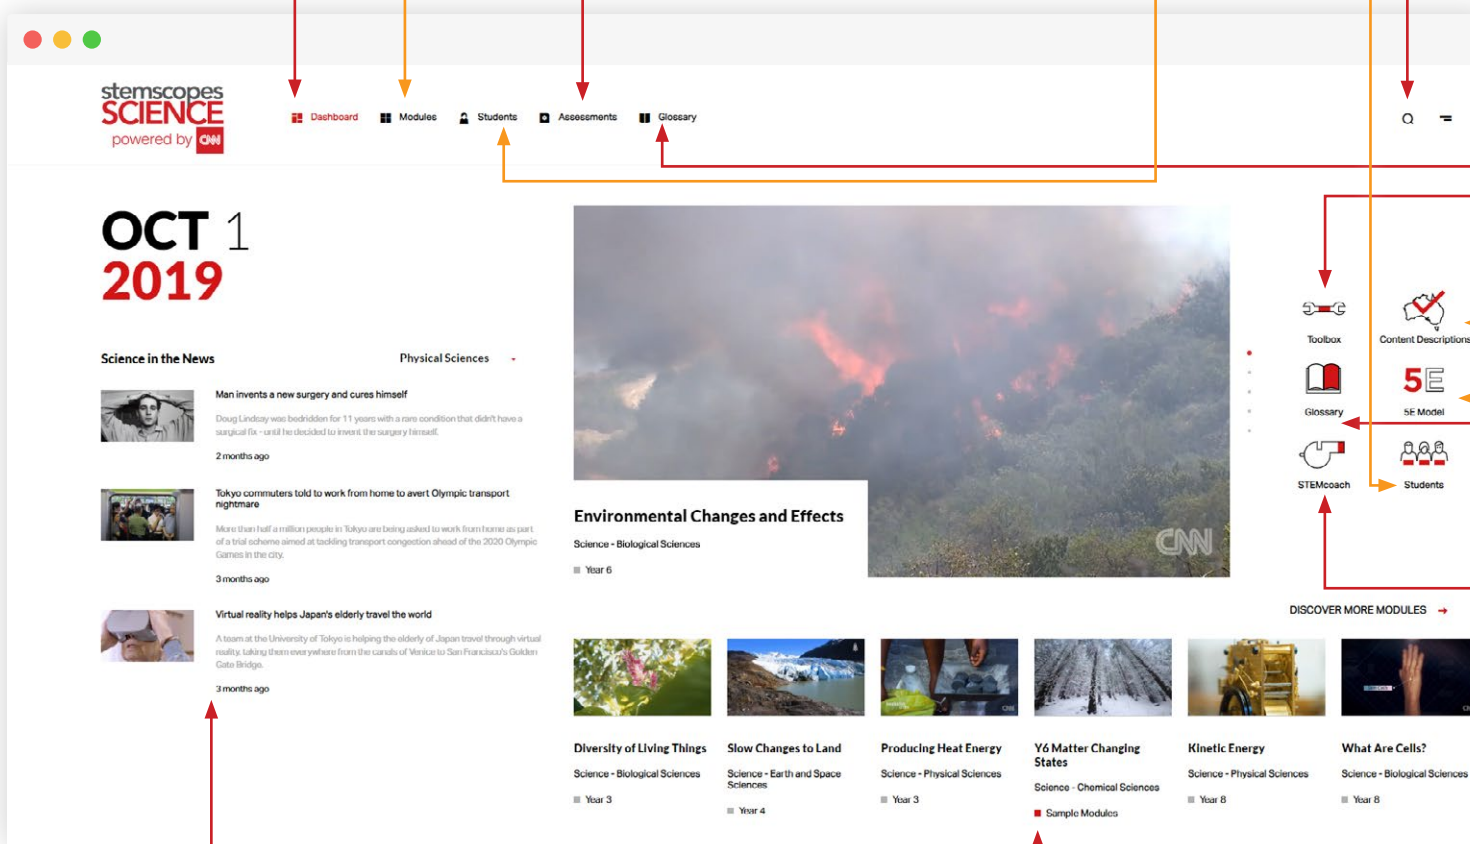

Modules: Here you'll find all the STEMscopes Science modules available to you.

Assessments: Create and assign your own assessments using questions and content from within STEMscopes Science.

Students: View and edit student details and see students' assignment results.

Search Bar: Use this tool to search for modules using key words or phrases e.g. animals.

Toolbox: This is your hub of resources and tools to help you get the most out of your STEMscopes experience.

Content Descriptions: Here you'll find the full science curriculum for your region with corresponding modules.

Glossary: Your personal database of key science terms.

5E Model: An overview of the research behind the 5E+IA model.

STEMcoach: Your library of professional development resources, classroom strategies and lessons, and STEM discussions to instigate with your colleagues.

Science in the News: See the most recent science-based CNN videos and articles. Each news piece comes with a link, providing you with the latest developments in science, building on the real-world experience.

Modules: This is a snapshot of some of the modules available to you.

Dashboard: This takes students to their Dashboard. From here they can see recent science-based CNN news and articles and a snapshot of students' assigned activities.

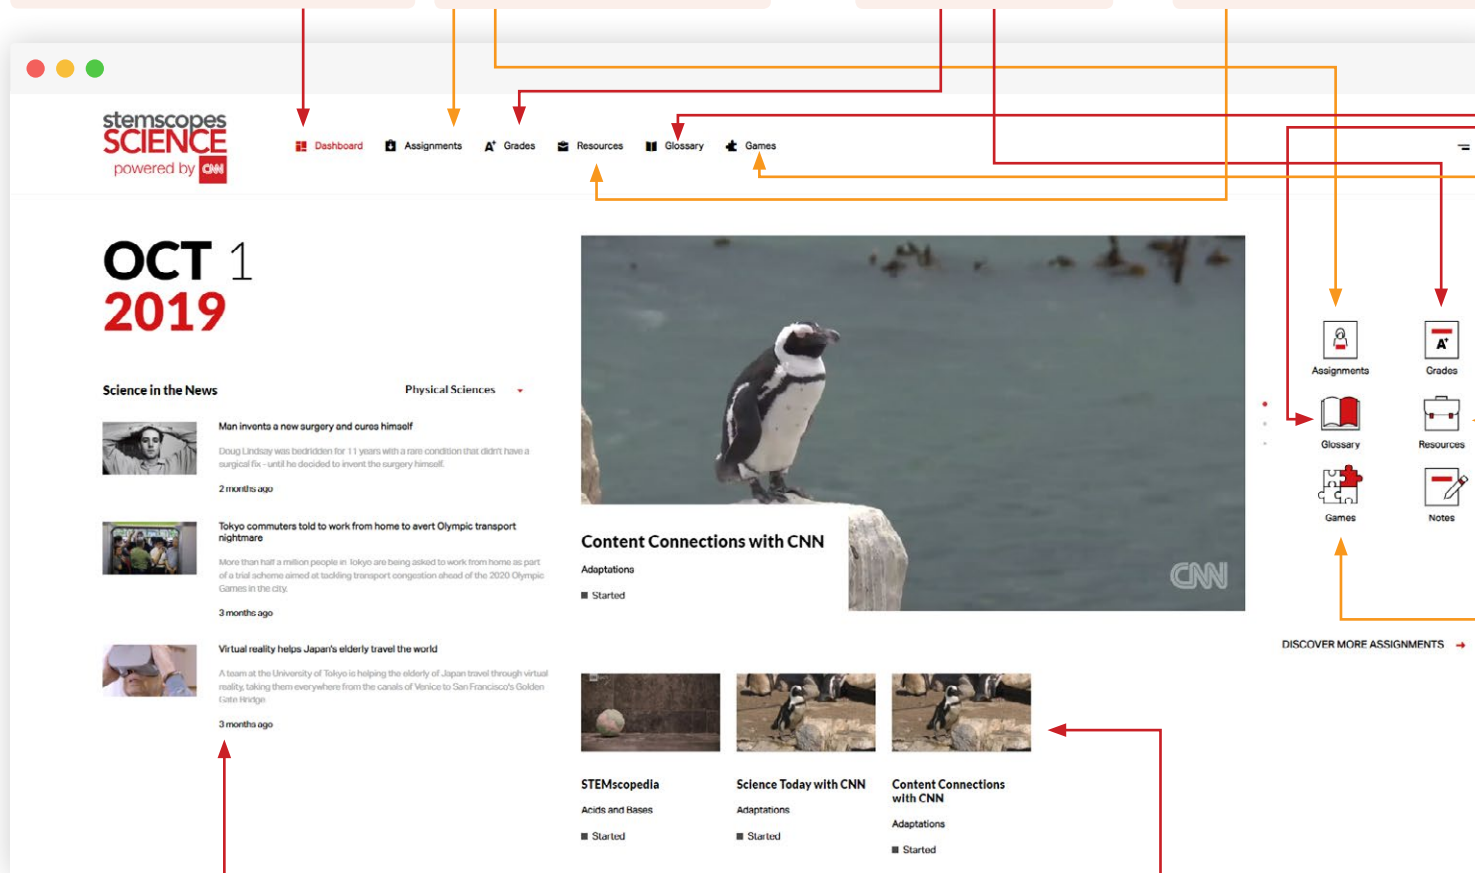

Assignments: From here students have a full view of the assignments they need to complete.

Grades: This is where students view their results for completed assignments.

Resources: A toolbox of resources for students to access at any time including STEMscopedia, Picture Vocabulary and CNN discovery activities.

Glossary: A digital dictionary of key science terms for students. Each term is accompanied by a visual aid.

Games: A collection of engaging educational games that reinforce science content and skills learnt in the modules.

Science in the News: Just like your Dashboard, students can see the most recent science-based CNN videos and articles. Each news piece comes with a link, so they can explore the latest developments in science, building on the real-world experience.
Note: Science in the News is not available in all regions.

Assignments: This is a visual snapshot of students' assigned activities.

Dashboard: This takes you to your Student Dashboard. From here see recent science-based CNN news and articles and a snapshot of your assigned activities.

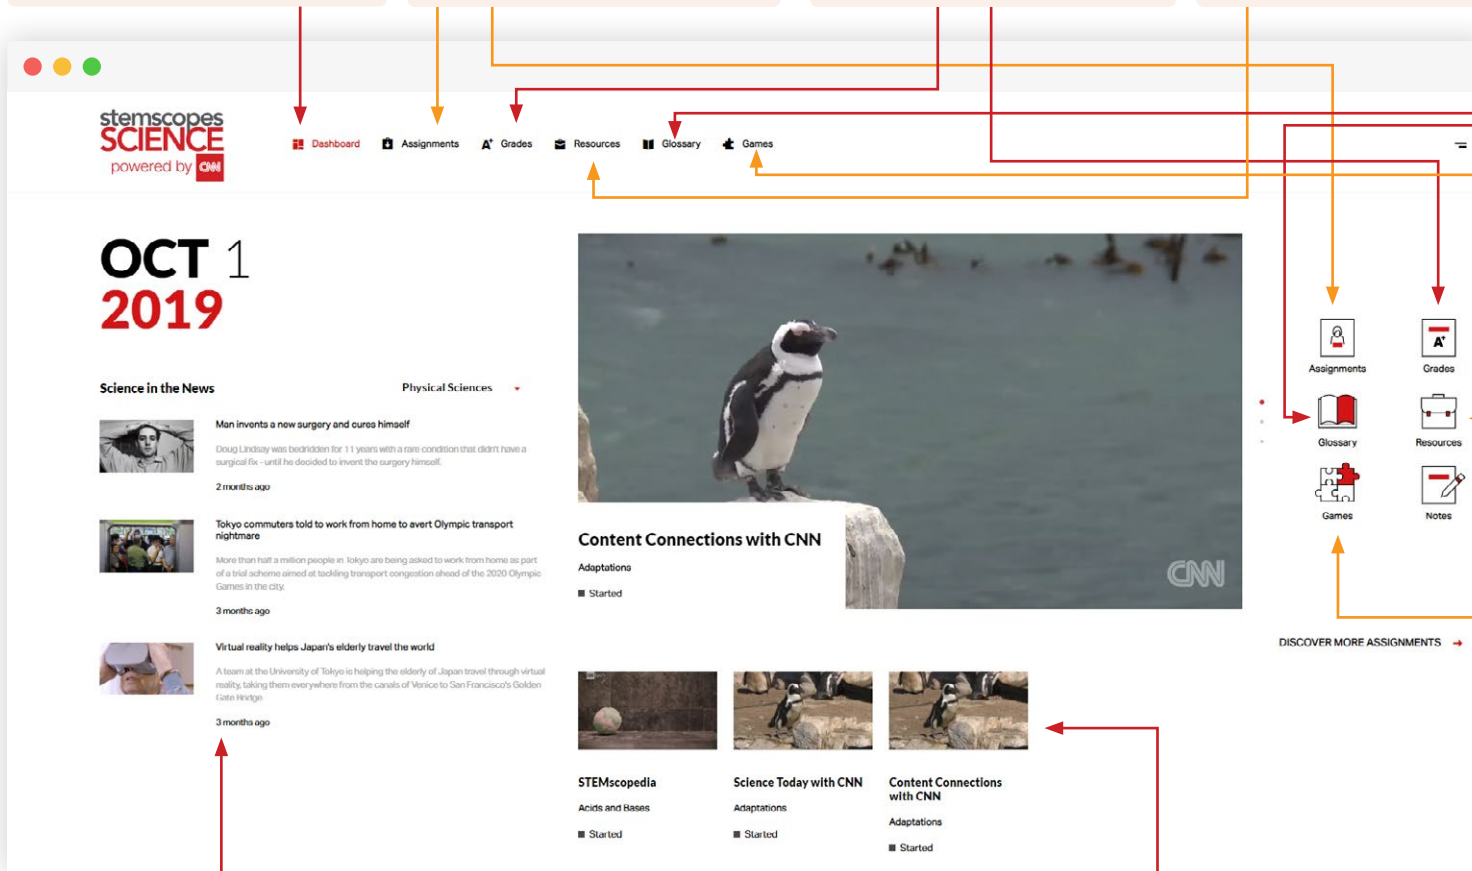

Assignments: Click here to see and complete assignments that have been assigned to you.

Grades: This is where you view results for your completed assignments.

Resources: Your toolbox of resources that you can access at any time. Resources include STEMscopedia, Picture Vocabulary and CNN discovery activities.

Glossary: Your digital dictionary of key science terms. Each term is accompanied by a visual aid.

Games: A collection of science-based games that reinforce the science content and skills you have learnt.

Science in the News: See the most recent science-based CNN videos and articles. Each news piece comes with a link, so you can explore the latest developments in science around the world.
