Quick Guide to Differentiation with Mathseeds

Mathseeds
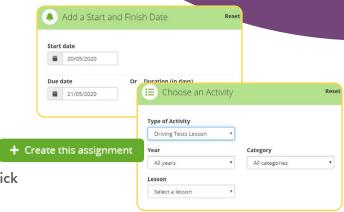

1 Assign a Driving Test

- Click **Assignment**
- Click **Create Assignment**
- Select **Students**
- Add a start and due date
- Select **Driving Test**
- Click **Create this assignment**

Once students have completed their Driving Test, click into Manage **Assignments** to view results.

2 Create learning groups

- Click **Management**
- Click **Manage Classes**
- Enter new class name
- Click **Students** and select students you would like in your new group
- Click **Add existing students into your class**

You can differentiate learning by assigning bespoke lessons to your new group (class). You can move students to another group/class anytime as they progress.

3 Use the Student PDF feature in Lessons to print worksheets

- Click **Lessons**
- Select a lesson
- Click **Resources**
- Click **Student PDF**

You have access to worksheets that align with each Mathseeds lesson.

4 Assign Problem Solving & Reasoning worksheets for any level of learning

- Click **Lessons**
- Select a lesson
- Click **Resources**
- Click **Problem Solving PDF**

Having access to Problem Solving activities allows you to assign work that helps develop critical thinking skills.
