

Check them out!

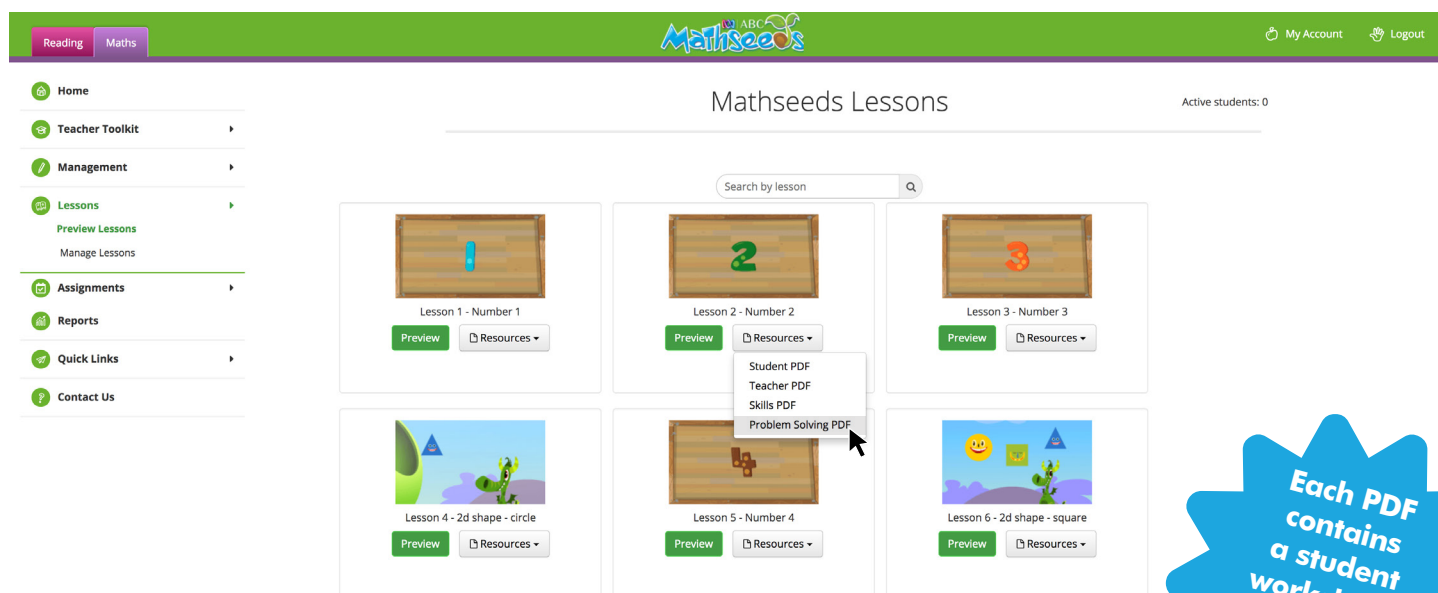

200 NEW Problem-solving activities available in Mathseeds!

Once students master the fundamental skills in the 6-core maths areas, challenge them further with your brand new **Mathseeds printable problem-solving activities**, targeting higher-level critical thinking skills.

These comprehensive PDF tasks present students with activities that develop a toolkit of strategies to reason, interpret, analyse and solve increasingly complex problems.

Available for every lesson, these printable problem-solving tasks are easily accessed through your **Teacher Dashboard > Lessons > Preview Lessons > Resources > Problem Solving PDF**.

Mathseeds Problem Solving Tasks

- Develop higher-level thinking skills across all key maths areas
- Strategies include act it out, drawing diagrams, writing equations, using tables, mental computation and logical thinking
- Each page includes collaborative elements and analysis where students are asked to reflect on their thinking, communicate this to peers and justify their mathematical reasoning.
